Varavel. a Learning Management System

learning management system

[lər-ning man-ij-muhnt sis-tuhm]

Phonetic (Standard)IPA

noun

1. a software application used to organize and distribute e-learning materials, assignments, and assessments; track and calculate grades; and facilitate communication among students and teachers. : LMS

Lessen distractions.

01

Harness your imagination and picture that you're at school and not at home.

02

Lock your phone away if you need to — don't be afraid to ask your parents to intervene.

03

Subscribe to productivity apps as well. These are great study companions so you can focus 100%.

Change it up.

You probably have a schedule for your lessons, but if things are becoming difficult to focus on, take a 5-minute break and come back to it — just let your teacher know.

Be kind to your mind if you need a break from a consistent schedule.

Speak up and ask for help.

When things get tough, don't just push it. Ask your parents, reach out to your teacher, or seek the help of your classmates.

Support will always be available as long as we ask for it.
